

IAPEN INDIA CLINICAL NUTRITION CONGRESS

MULTIMODAL NUTRITION DYNAMICS

8th & 9th Feb 2024: ESPEN LLL courses | 9th Feb 2024: Pre-Conference
10th & 11th Feb 2024: Main Conference • VENUE: Sahara Star, Mumbai.

HOSTED BY: NAVI MUMBAI & MUMBAI CHAPTER IAPEN INDIA.

MESSAGE FROM THE CORE COMMITTEE

GREETINGS FROM IAPEN INDIA

IAPEN INDIA is our nation's PEN society with its state chapters spread all over India. As an association, its contribution to the growth and spread of knowledge in the field of clinical nutrition and community nutrition at large in India is enormously appreciated. IAPEN INDIA has the privilege of being the only PEN society from India, recognized by European ESPEN and American ASPEN. ICNC – "IAPEN INDIA Clinical Nutrition Congress" is our annual event which is hosted by various chapter every year. This Year our theme is **"MULTI-MODAL NUTRITION DYNAMICS"**

ICNC 2024 – Multimodal Nutritional Dynamics rests on four edifices:

- **Synergistic Multimodal Healthcare Systems:** There are many routes to healing. Each modality is a spoke in the wheel of healthcare. This conference on Multimodal Nutrition Dynamics focuses on exploring multiple routes to healthcare- nutrition in clinics, corporates, critical care and the community. The conference will highlight modalities and various strategies in maintaining health and preventing disease.
 - **Teamwork Synergistics:** ICNC 2024 will emphasize extending the understanding of the Nutritional Care Process and entering the Health Care Process; with new ways of working as a mindful teamwork. With the incorporation of workshops and sessions for allied professionals in medicine (nursing care, physiotherapy, alternative medicine etc); this
-

one-of-a-kind Congress will be riveting for all health care professionals.

- **Exploration of Novel Possibilities in Healthcare:** ICNC 2024 – Multimodal Nutritional Dynamics, will offer the delegates learnings on translational research into applications, alternative strategies and the use of smart digital tools in nutritional and healthcare practice. All attendees will have a plethora of unique avenues to imbibe from and incorporate into their practice. This blended with the dynamic nature of nutrition practice with the tools of cutting-edge science and research will be richly satisfying to the delegate.

- **Blending of Science with Celebration:** The melding of education with practices as takeaways and the emphasis on research dissemination with scientific paper presentations' the cup of knowledge will be full. Empowerment with practical application-based approaches, concept of blending Science with Celebration, knowledge based fun and breezy events and a unique gala dinner with innovative competitions sprinkled with IAPEN magic is for all to take.

ICNC 2024 – Multimodal Nutrition Dynamics: A space where the delegate will be transformed and prepared for the healthcare possibilities on the horizon; to welcome the future of Sustainable Multipronged Nutritional care.

ABSTRACT

- Short summary of the study including aim, brief methodology, salient results with statistical outcome and conclusion.

INTRODUCTION (VANCOUVER STYLE OF CITATION IN THE TEXT)

- Scientific information most relevant to the study
- Rationale for the study
- Aim/s and Objectives

METHODOLOGY

- Detailed description of methodology
 - **For studies involving human participants**
 - Location of the study, sample characteristics, sampling design, inclusion exclusion criteria, tools of data collection, statistical tests applied to analyse the data.
 - Details of ethics clearance obtained (if applicable)
 - For food product development
 - Research design-details of source/procurement of materials used
 - Detailed methodology of developing the product and sensory analysis
 - Details of data analysis
- Sources of methods/techniques used (References)

RESULTS AND DISCUSSION:

- Clear and brief description of the results obtained in the study
- Discussion of results in the light of scientific evidence
- Data presented in the form of tables, diagrams
- Emphasis on data-driven conclusions.

CONCLUSION

- Conclusions drawn from the results obtained in the study.
